About This Game

Worms™ Clan Wars brings friends and families together in the noble pursuit of self-improvement, world domination and exploding sheep.

Worms™ Clan Wars is the biggest and best Worms™ game to date - more worms, larger landscapes, more dynamic water, more weapons and more customisation items than ever before. Worms™ Clan Wars is designed to take full advantage of next gen PC hardware. It features beautiful high definition 3D visuals (but still retains the classic 2D gameplay) with new lighting effects, new features to help users interact socially, exciting additions to improve the single player experience, and more of everything a Worms fan could want.

Form Clans, Take On The World

Join together with friends and other Worms™ Clan Wars players to form a fearsome team; name your clan, design your own emblem, promote other players to act as leaders and officers. Enter your clan into the league and fight together to make your mark on the leaderboards. Nobody wants an empty trophy cabinet!

Keep in touch with friends and foes alike using WormNET, the game's own lobby and chat system. Each clan has its own chat channel, and a number of other channels cater for a variety of hardcore gaming tastes! Jump online to hang out, chat, recruit new members or find games.

Stay connected with the game when on the road with a mobile companion application (web, iOS and Android). This is the best online multiplayer Worms™ ever!

Slick Single Player Gameplay Too

Story Mode' adds a ton of variety by introducing physics based contraptions for the first time ever. A plethora of interesting machinery spices up the gameplay, and makes solo Worms™ much more fun! The single-player game isn't only about dealing death and destruction, it's also about negotiating tricky swinging rope bridges and rescuing friendlies from death defying traps!

The player spends much more time playing, and much less time waiting for their A.I. opponent to take a shot.

Get Busy With Steam Workshop

Fancy yourself as the artistic type? Steam Workshop integration allows you to get creative! Now you can make your worms wear exactly the outfits that you want them to. Import your own 3D objects and textures into the game using a separate tool. You can model hats, glasses, moustaches, trinkets and gravestones for your worms. You can also design your own landscapes!

Proud of your creations? You can share them online, thanks to Steam Workshop!

Pros: Very fun game, also pretty cheap in the frequent sales. Includes Multiplayer as well as Singleplayer. Has very many options to customize your gaming experience. The game has a surprisingly high gameplay-depth which will surprise you with little tricks and new strategies even a few dozen hours in it while it doesn't really give you a lot of info about those gameplay basics itself if you don't want to sit through the tiring Singleplayer-tutorials. You may want to go check out one of the guides available.

Cons: Barely any players available online (go play between 9 o' clock PM and 1 o' clock AM if you want to find any matches, the rest of the time the lobby-list is just a barren wasteland) and if you try to find a game as solo-player you'll always get kicked out of the few open lobbies people have opened for their friends. (Or even worse, they'll team against you unfairly.) Suboptimal technical execution of the game. (I had friends lagging even on high spec computers as it doesn't seem to use graphics cards properly or has a gigantic amount of unnecessary background calculating going on. Also it's worth noting that everything has a bit of a delay, which isn't game breaking though as the game is turn based anyways. Just make sure not to wait until the last second of your turn to take your action and then start complaining that the camera didn't scroll out and over to the enemy worm in time.) Rarely the game also has glitches getting one of your worms stuck in a gap they just crawled in themselves or the water can extremely rarely defy physics and keep moving upwards and downwards inside a hole, essentially making it impossible to continue the match as it won't let you start your next turn.

TL, DR: Good and pretty cheap game with quite a few technical flaws and too few people available for playing it online. Can be excellent fun with friends, but please don't be one of those unsocial bastards kicking random single people out of their lobby and especially don't start teaming against solo players with your friends thinking you're so cool for doing it.. Very gut game my friends. legendary game.. EXTREMELY fun online gameplay with friends but the campaign's level design is soooooooooo id rather play hunt down the freeman.. Worms vay be bu oyunu oynamayan yoktur herhalde \u00f6ncelerden tu\u015flu telefonlarda vard\u0131 bu oyun day\u0131m\u0131n telefonunu a\u0131p sabahlara kadar oynuyordum ne g\u00fcnl\u00fcrdi ama ee tabi \u015fu an o kadar keyfi \u00e7\u0131km\u0131yor oda ayr\u0131 modas\u0131 \u00e7oktan ge\u00e7ti bir ka\u00e7 saat sonra s\u0131k\u0131l\u0131ca\u011f\u0131ndan eminim ama tabi ki\u015fiden ki\u015fiye de\u011fi\u015fir bu durum tavsiye ederimiyim ederim indirimde zaten para etmiyor.
